

How can we notify students their accounts are reviewed?

From our experience working with schools and districts, we've put together a letter template that can be used to notify students their accounts are reviewed:

[Insert your district/school name here] uses Gaggle to review your digital communications, files and other content for inappropriate language and images. This is to ensure that school accounts and/or property are not misused or abused as outlined in policies set forth by [Insert your district/school name here]. Issues such as cyberbullying, violence, profanity, hate language and self-harm will be reported to administrators at the school or district in order to maintain student safety without disrupting classroom productivity and collaboration.
